Fulfillment and Resource Sharing: Part 1

Basecamp

The screenshot shows the Basecamp 2 web interface. At the top, there is a navigation bar with the Basecamp logo, the text 'Basecamp 2', and several menu items: 'Projects', 'Calendar', 'Everything', 'Progress', 'Everyone', and 'Me'. On the left side, there is a vertical green bar with the word 'Help' written vertically. Below the navigation bar, there are several icons for different views: a grid of squares, a list of squares, and a list of horizontal lines. The main content area features a large project card for '972HAI- Alma & Primo Project'. The card has a white background and a yellow star icon in the top right corner. Below the title, it says 'Last updated on Sep 20'. At the bottom of the card is a row of eight circular icons, each representing a different user or resource. To the right of the project card is a large, light gray area with a large star icon and the text 'Starred Project'. Below the project card, there is a section titled 'ALL PROJECTS A-Z'. Under this section, there are three rows of project listings. The first row is labeled '0-9' and contains one project: '★ 972HAI- Alma & Primo Project'. The second row is labeled 'A' and contains one project: 'Alma Resource Sharing UK'.

Include Fulfillment Notes when Shipping items in Resource Sharing

It would be nice if pop-up fulfillment notes on an item record were attached to a resource sharing request when an item is shipped, much like the barcode currently does. So if a damaged book has a note saying "Underlining noted," that note would attach to the request record so that the borrowing institution could see it. This would make it easier for the people processing on either end to know whether an item shipped with damage, or a set shipped with a certain amount of items, etc.

Producing the shipping forms by supplier

Each time a request has been marked "Ship" or "Return", the request details will be collected on a "Shipping Form" (by supplier).

When ready to ship a package -with returned/requested books- to another library, "print form" will:

1. Produce a full detailed form to include with the box
2. Will start a new form for future package.
