

The American Colony Archive Collections are the latest addition to a multi-faceted and cross-national narrative, preserved throughout the world in public and private repositories. Masters of many arts, multi-cultural, and deeply involved with the Holy Land and its people, the American Colony Founders and Members left us with an outstanding panorama of their own eccentric life - and of a rapidly changing, borderless Middle East.

The Management and the Board of Directors of the American Colony request the pleasure of your company for a Cocktail Reception to celebrate the opening of the American Colony Archive Collections to the public.

VISIONARIES and CREATORS: The American Colony Archive Collections, 1881-2008
